Art Unit: 3652

1. Claims 5-7, 12, 16, and 22-46 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 1-4, 8-11, 13-15, 17-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent #2121347 in view of Durham, Japanese Patent #817753, and Japanese Patent #11130249.

Japanese Patent #2121347 discloses a substantially similar support, see Fig. 3. Japanese Patent #2121347 lacks a curved seat, modified ball and center support for a rectangular substrate. Durham discloses the conventional use of a curved seat. Japanese Patent #817753 discloses the use of a modified ball. Japanese Patent #11130249 discloses the use of a central support for a rectangular substrate. It would have been obvious to a mechanic with ordinary skill in the art at the time the invention

Art Unit: 3652

was made to provide these features to the primary reference. The motivation is the known substitution of equivalents.

5. Japanese Patent #62193139 is cited to show similar structure.

6. The drawings are objected to because Fig. 3 must be labeled prior art. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Bratlie whose telephone number is (703) 308-2669. The examiner can normally be reached on Mondays through Thursday from 6:30-5:00. Friday is the examiner's day off.
